This cross-sectional diagram illustrates a cylindrical assembly, likely a bearing or seal. It features an outer ring 50 with a textured or ribbed outer surface. Inside the outer ring is a central hub 23. Between the hub and the outer ring are two intermediate rings, each with a distinct cross-hatched or textured pattern. The hub 23 has a vertical slot or channel running through its center, which is also cross-hatched. The entire assembly is shown in a perspective view, highlighting the concentric nature of the rings and the central hub.
